My Search For A Bigger God PROPHETIC DISCOVERIES

By Gary Hamby

To explain my quest, let's just say I had found the current religious explanations of Prophetic Scripture to be too simplistic and lacking in scientific evidence. If the God of Creation intended to inform us of His intentions we were woefully lost in interpretation and allegories.

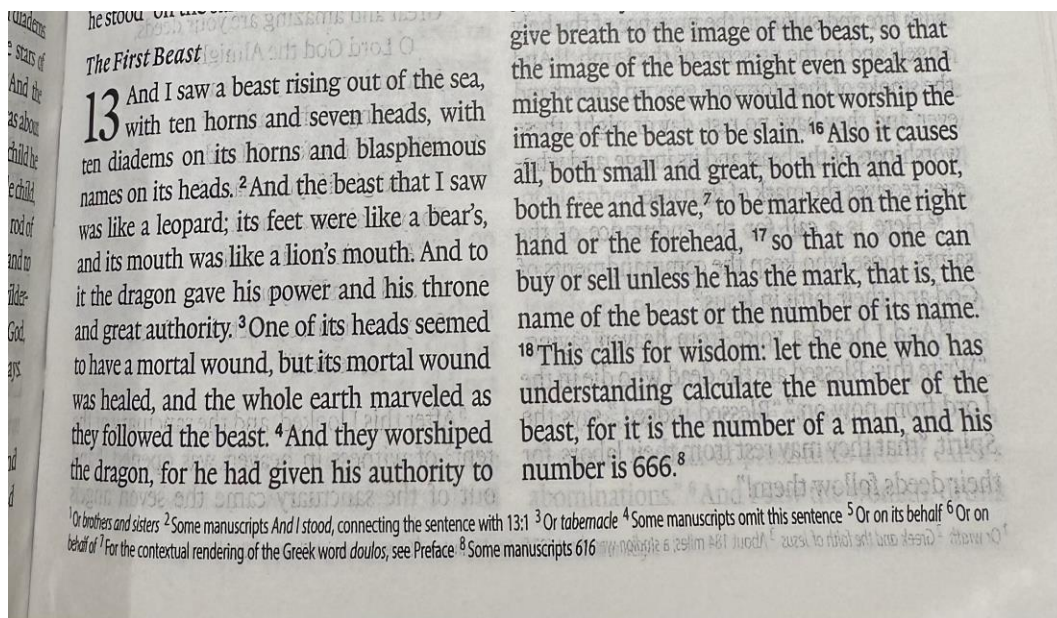

About 40 years ago, I was fortunate to become embroiled in the new world of personal computing. At this time, in order to work with the possibilities of computing, you could investigate the very foundations of electronics and computer language. While just being a novice computer consultant, I was self-taught in WordPerfect 5.1 - a fabulous word processing package that drove computing worldwide in legal, academic and scientific fields.

The computer became a Universal Language worldwide. English was the dominant system and symbols and characters started there and moved to other languages later.

The computer became the central container of all information and programmers struggled to include all the nearly infinite possibilities that brought up. One limitation was that the keyboard only contained 88 characters with an alternate system called ASCII Character System adding another 1045 characters. So, all worldly information had to be funneled through that constraint.

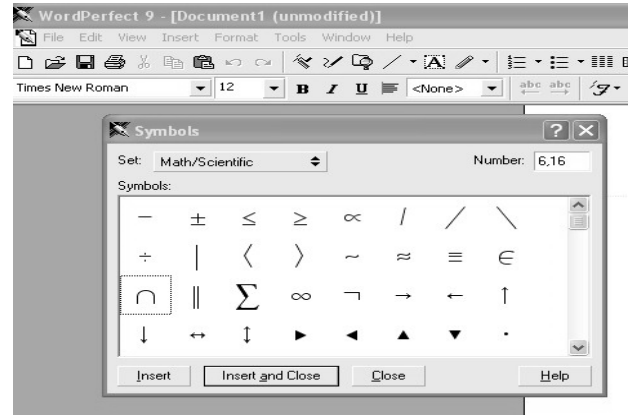

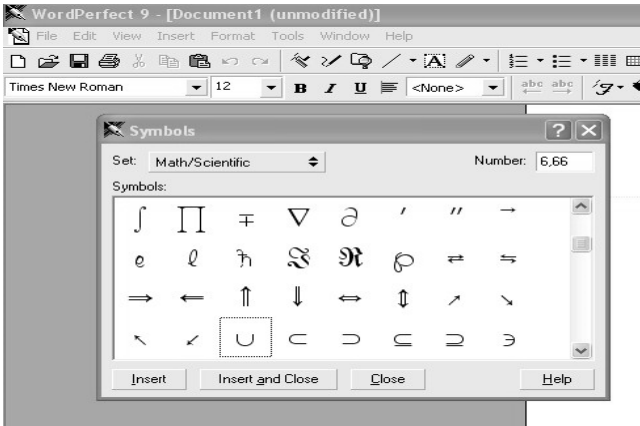

Revelation

I had always been fascinated by the prophetic warning of 666 in Revelation 13:18. Textual notes, as seen below, add that some manuscripts read 616. This was my digital gateway into a scientific verification of an ancient Scripture. No longer was I dealing with interpretation and opinion, but I had apparently stumbled upon a direct link between the ancient and modern world.

The computer processes information in a direct way. If I ask for something, the computer wants to return a single answer. Computing would fail if every request showed 50 answers. Knowing this, I felt assured that searching for 666 and 616 in computer characters would yield a special relationship.

I was stunned when I found the numbers related in code. I found this in WordPerfect 5.1 using their WP 9 Charts. In order to type these symbols, you would press *Control* and *V* keys then type *6,66* or *6,16* to insert the character in your document. The chart below shows the result. It means *Math and Scientific* set 6, character 66.

These symbols are used in mathematical formulas for Set Notation for a Venn diagram. A Venn diagram uses overlapping circles to show relationships between sets. In this case we are looking at The Union (6,66 - U) and The Intersection (6,16 - ∩) symbols as indicated in the boxes above. You can better recognize a Venn diagram by the examples below:

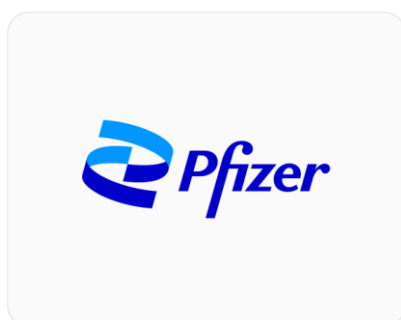

Both of these symbols represent worldwide monetary systems. At this point I realized I have a direct digital correlation in the computer to a possible Mark of the Beast. I have possibly connected the biblical numerical warning directly to the worldwide monetary system.

I'm genuinely not this smart! Without the Holy Spirit helping I would never have found this. We serve an awesome God, not bound by time. These cashless worldwide monetary systems are now in place and God inserted the warning in His Word almost 2,000 years ago. That's one reason why we can trust prophecy.

The Two U's and S

After the discovery of the 6,66 and 6,16 symbols in the Character Sets, other graphics began to take on significant meaning. These Logos or Trademarks were worldwide but contained a link to my findings. The U's in these logos don't seem to represent the company at all. Sun Microsystems used U's to mimic S's but are clearly U's. The Juxtaposed U forms a disconnected S in the SBC Logo. The Switch Card is the UK Debit Card. Pfizer joins the look. Note also the sunlight pattern between light and dark on the Earth.

We see from these examples, some relationship seems to be indicated between the S, U and 6,66 and 6,16. It is also noteworthy that Satan is referred to as the Serpent (Rev 12:9), which is always shown as multi-directional. So S's and Serpent go together.

In Greek "Logos" is "The Word". For example, we read in John 1:1 concerning Christ, "In the beginning was the Word (logos), and the Word (logos) was with the God, and the Word (logos) was God." In the world system, *logos* are Business Trademarks. Satan tries to counterfeit the work of Christ. This is the beginning of seeing how comprehensive God's warning is. Symbols and language are already in place for the Mark of the Beast and End Times.

These observations are merely an introduction to the fascinating subject of how modern symbols help us to understand end-time prophecies. Keep looking Up! His Redemption draws near.

Gary Hamby has extensive experience in Banking, Insurance, Computing and Marketing. Gary has drawn on multiple industries to assemble the Scriptural view presented. A native Oklahoman, Gary graduated from the University of Oklahoma. The information linked to this document has been accumulating for 40 years, testing each concept and seeing confirmation increasing each year.
